This port can be changed to match your SNMP configuration. Skip to the next procedure. You can have up to three DNS servers. The license file has a.slf suffix. In order to maintain the usefulness of your appliance, it is crucial that you facilitate automated communications between the appliance and Symantec. See Required ports on page 22. 3 When you are prompted, type one of the following responses: YES The summary information is correct. Troubleshooting license file registration If you have difficulty installing a license during installation, the installation wizard lets you troubleshoot the issue with the Traceroute utility or the Ping utility. Virtual IP address: Netmask: Port: Table 1-3 provides the information to have on hand to configure a Scanner for inbound mail filtering. You can do create multiple Ethernet interfaces by creating a virtual IP address. 12 12 Installing Symantec Messaging Gateway Before you install Many reputation features, such as Connection Classification, Fastpass, and sender groups that match IP addresses, do not function properly when the Scanner is downstream of one or more internal MTAs. To ensure that all incoming IP addresses are correctly identified and not confused with internal IP addresses, it is best to place your Scanner at the messaging gateway. See System requirements on page 24. See Specifying gateway and DNS IP addresses on page To continue installation, next you specify gateway and DNS IP addresses. 4 Connect the appliance with one of the following methods: Connect a keyboard and VGA monitor to the appliance. The default logon address is as follows: where is the host name that you designate for your appliance during setup or the IP address. 5 Connect an Ethernet cable to the Ethernet jack that is labeled 1 on the back panel of the appliance, which corresponds to eth0. Updating to the latest software during initial setup Symantec recommends that you tuobA eeS .daehrevo lanoitidda esuac nac snoitcennoc PTMS gniogtuO .trop 1 tenrehtE ruoy rof sserdda eht ylekil tsom si sserdda sihT .revres SND lanoitidda na ot tnaw ton od uoY ON .ecnamrofrep edarged nac spuorg ycilop ynam rof segassem detacrufiB .slevel elbatpeccanu ot ecnamrofrep edarged ton srennnacs lanoitddada eht taht ede ecnamrofrep ,srennacs dda .noamod ro ro sserldda pi na edivorp ecnatpecca liam dnuobtuo :ssridda pi gniretlif liam dnuobtuo dna draobyeK .srennacS erom ro eno slortnoc retneC lortnoC enO .rennacS eht pu teS noitpircsed dna ksaT)deunitnoc(ssecorp noitallatsni yawetaG gnigasseM cetnamyS 01 petS 1-2 elbaT 92 tcudorp yawetaG gnigasseM cetnamyS eht gnillatsnI tcudorp yawetaG gnigasseM cetnamyS eht gnillatsnI 92.83 egap no retneC lortnoC eht gnirugifnoC eeS .trop laires a hguorht retupmoc rehtona morf ssecca ro rotinom AGV dna draobyek a deen uoY ecnailppa eht ot ssecca elosnoC sliateD noitpircseD metI detelpmoC tsilkcehc noitarugifnoc laitinI 2-1 elbaT 31 llatsni uoy erofeB yawetaG gnigasseM cetnamyS gnillatsnI 31 .snoitaluger rosseccus yna dna ,elbacilppa sa ,"noitatnemucoD erawtfoS retupmoC laicremmoC ro erawtfoS retupmoC laicremmoC ni sthgiR" , SRAFD dna "sthgiR Detcirtser - erawtfos retmocremoc" noitces raped denifed in the sthgir detcirtser tcejbus dna raf denifed in the erawtfos retupmoc laicremoc eb ot htnemucos dedatfos dedatfos denmucos dedatfos denmucos dedatfos denmucod snapfos denunemucos dedatfos dedatfos denunemucod snatfos dedatfos dedatfos dedatfos denunemucod .1 tes erawtfos ecnailppa eht trats oT .ecnamrofrep gnigassem dnuobtuo tcapmi nac gningis MIKD gnilbanE noitacitnehtua PTMS gningis MIKD .73 egap no putes laitini gnirud erawtfos tsetal eht ot gnitadpU eeS ?epyT ...snoitarugifnoc noitallatsni tuobA 9 .gnizis ecnamrofrep htiw pleh lanoitidda rof evitatneserper selas A tcatnoc .elbaliava si ,tcudorp eht retsiger uoy retfa etur erawtfos tnerruc eht Configurations on page 9. Place this file on the computer from which you access the control center. Set the scanner based on one of the following scenarios: the scanner is located on the same appliance of the control center. The control center provides information on the status of all Symantec messaging gateway hosts in your environment, including registers and reports. Some of the third -party programs are available in open source or free software licenses. See the recording of the license on the page at the end of the software update, perform one of the following activities: update the browser. To avoid problems with the routing of messages, this host name should not be your mail domain, such as Symantecexample.com. See Specific of Ethernet interfaces on the page Specify the static IP address for routing. For example: when requested, type the sober mask for the Ethernet interface 1. Connect another computer to the Appliance with the serial port 30 30 Installation of the Symantec Messaging Gateway product by installing the Symantec Messaging Gateway product use a null modem cable with A DB9 connector and settings of 9600 BPS, 8/n/1. If it is specified that this appliance is a control center and a scanner, the guided procedure continues with the scanner set after the control center has completed the finishes. See the role for Appliance on page 34. The product described in this document is distributed in licenses that limit its use, copy, distribution and decomposition/reversa engineering. 1. This setting is to force the path to be associated with the specified device. Specifies Ethernet interfaces, see specifying the Ethernet interfaces on page 31. For more information on how to specify the MTA Gateway via the control center, consult the guide to the administration of the gateway of cetnamyS cetnamyS acitsiggassem alled enoizallatsnI 73.ottorroc o etnacnam ,otudacs aznecil id elif nu o 344 asuihc atrop ,elibisseccani yxorp nu id asuac a erillaf ²Ãup enoizartsiger aL .etrop etseuq a ossecca'l onatnesnoc llawerif iout i ehc itarucissA .cetnamyS Installation of the product of the Symantec Messaging Gateway product if you have another license file for a different function, repeat the process for recording each license. 7 If the scanner uses a proxy server for communications with Symantec, click Proxy Server. Specifies a static IP address for routing after setting the Ethernet interfaces, the next step in the configuration of the appliance is set up a static IP address for routing. It is possible to specify more addresses and domains. It is also possible to set the registers to be eliminated more frequently. You are reading a free preview The pages from 49 to 76 are not shown in this preview. However, you can use the same license file for each scanner. Please consult the third -party legal notice appendix to this documentation or TPIP Readme file that accompanies this Symantec product for more information on third -party programs. You are reading a free preview The pages from 25 to 44 are not shown in this preview. Configuration of the Control Center see configuration of the control center on page 38. No, you do not want to add another static IP address. 25 Internal mail servers Scanner Scanners internal mail traffic 25 internet scanners internet internet mail Traffic 25 scans internet internet mail Traffic 25 scanners internal server SMTP Authentication SMTP Forward 53 UDP Scanner DNS Internet Lookup The Destination Server can be internal DNS server or Internet servers Root Root Root Root Root Root DNS. Address of the administrator: NTP server (optional) it is possible to specify an internet or internal NTP server to manage time. A physical door One Standard IP address: 25 The route of the appliance input and out through the same physical ethernet port, using the same IP address. IP address or CIDR block of the host of ,anigap ,anigap cetnamyS id eznecil id beW lus aznecil allus inoizamrofni el otatelpmoc reva opod adilav aznecil id eliF enoizircseD otatelpmoc otnemelE)aunitnoc(2-1 elaizini enoizarugifnoc alled ollortnoc id ocnelE 51 erallatsni id amirP cetnamyS acitsiggassem id yawetag led enoizallatsnI 51 .1 :eter alled o s a license file. The use of a shorter encryption key can reduce this impact. See specific to a static IP address for page routing when requested, type the IP address for the Ethernet 2. System requirements. Host domain name must be changed the password during this phase. See Setting the Symantec Messaging Gateway Virtual Edition on page 30.28 28 Installation of the Symantec Installation Gateway product Symantec Messaging Gateway Table 2-1 Passage 2 Symantec Messaging Gateway Installation Process (Continue) Activities and description lights the appliance. 80 Control Center Internet Threats Update the threat threat level appears on the Dashboard page. 5 Complete registration. Install the scanners on another appliance from the control center through the control center. See Specific of a static IP address for routing on the default gateway page see specific to the IP Gateway and DNS addresses on page 33. 4 Click on the registration license. 587 SMTP internet scanners authentication 636 Control Center/ Scanners Server LDAP SSL access to the SSL encrypted LDAP server access to the LDAP server to search users, groups and distribution lists if the directory data service is enabled. If your software is updated, the configuration wizard is displayed. See installation of the Symantec Messaging Gateway product on page 27.36 36 Installation of the Symantec messaging gateway product installation of the Symantec Messaging Gateway product to record license 1 from a computer that can access the appliance, identify appliance in a browser. See setting of the appliance hardware on page 29. 3 When you are required if you want to enter another DNS server, type one of the following answers: you want to add a server additional. 3 On the access page to the Control Center, access as a user administrator and use the specified password set during the initial configuration. The administrators can associate only one host name or IP address as MTA to which it is transmitted. If a software update is available, the Software Update page is displayed. In medium and large environments, this configuration can slow performance. Configure scheduled reports to run when usage is low. See Ports used by Symantec Messaging Gateway on page 19. 80 Internet Scanners Default Automatic Antivirus Updates and Quick Response Antivirus Updates 123 UDP Control Center/Internet Scanners/Internal NTP Servers Accessory Time Synchronization Server 21 Installing Symantec Messaging Gateway Before Installing 21 Table 1-6 Ports to Open on the Network for Symantec Messaging Gateway (continued) Protocol Port Origin Destination Notes 161 UDP SNMP Server Control Center/ Scanner SNMP Management The default port for SNMP communications. If the registration is successful, the License Registration Information page is displayed. This configuration uses two different IP addresses, one of which is virtual. 443 Control Center/ Scanner: Internet Rules Updates, Software Updates, and License Registration Symantec sends rule updates to accessories. After restarting the accessory, you can register it. IP address of the default gateway (default router): The route requires the DNS of the DNS server (Domain Name Server). To use HTTP, you need to enable HTTP via the command line interface and specify the port. For information on the http command, see the Symantec Messaging Gateway Administration Guide. The results are displayed in the Results text box. The higher the number of users accessing Spam Quarantine, the higher the performance overload required. Other names may be trademarks of their respective owners. They can increase the tails of the discs with For remote servers that may not immediately accept new ones. The doors used by Symantec Messaging Gateway in Table 1-6 list the doors used by the components and functions of Symantec Messaging Gateway. It is possible to delete identified messages such as spam or reduce spam conservation time. It is also possible possible The IP address of the MTA Gateway after installation via the control center. LDAP searches for the recipients of messages compared to a limited LDAP server can seriously compromise spam quarantine performance. This door is disabled by default. Use political groups as necessary, but keep in mind that a large number of political groups can affect performance. Porta: 3. review the following topics to help you plan the distribution. Spam quarantine server can slow down. New password: Host domain name: to avoid problems with the routing of messages, this host name should not be your mail domain, such as Symantecexample.com. See the post-installation activities on page 63. After correctly completing the installation, perform post-installation activities. Performance can be affected when a control center must collect recording and more scanner statistics. 3 to continue the installation, then configure the host. For example: 32 32 Installation of the Symantec messaging gateway product installation of the Symantec 3 messaging gateway product when you are required if you want to use the second Ethernet interface, interface 2, type one of the following responses: Year, you want to use the interface 2. You are reading a free preview The pages from 7 to 8 are not shown in this preview. See specification of the Gateway and DNS addresses on the page when requested, specify the IP address or CIDR block of the destination or network host. 9 before installing the functions of the appliance where you can place your scanners on the environmental factors that influence the control list for installation of the control performance of the doors of the doors of the scanner doors that install the system characteristics of the requests required that acificepS acificepS tenrehtE eccafretni elled enoizatsopmI ecnailppA erawtfos led oivvA noitidE lautriV yawetaG gnigasseM cetnamyS odnatsopmi ecnailppa'lled erawdrah'l atsopmi ehc yawetaG gnigasseM cetnamyS ottodorp lI enoizallatsnI yawetaG gnigasseM cetnamyS ottodorp led enoizallatsnI 2 olotipac inoizatserp ellus eriulfni kiegatag gnigassem cetnamys Eht Ees .sserldda pi ro emman tsoh eht eht epyt ,dleif serldda pi ro eht neht dna ,gnip ro etuorecart ehtsec tce no ecnailppa eht rof elor eht gniyficepS eeS .ycilop troppus lacinhcet esirpretne tnerruc-neht eht dna tnemeerga troppus ruoy htiw ecnadrocca ni dereviled eb lliw secivres troppus llA :LRU gniwollof eht ta etis beW ruo tisiv nac uoy ,sgnireffo troppus s cetnamyS tuoba noitamrofni roF secivreS tnemeganaM tnuoccA edulcni taht sgnireffo ecivres muimerP sisab keew a syad 7 ,yad a sruoh 42 ro sruoh ssenisub lanoiger a no desahcrup troppus labolG sedargpu erawtfos sreviled taht ecnarussa edargpU noitamrofni etunim-eht-ot-pu dna esnopser dipar sedivorp taht troppus desab-beW ro /DNA Enohpelet Noitazinagro Esna ROF ECIVRES FO TNUOMA THGIR EHT tceles ot ytilibixelf eht uoy Evig taht snoitpo troPPus fo epnar :gniwollfpus sgnireffo sgnireffo sgnireff myS .enitnarauQ mapS fo ezis mumixam eht ecudeR .won erawtfos ruoy setadpU .bat elosnoc eht no kcilc neht dna enihcam lautriV yawetaG gnigasseM cetnamyS eht tceles ,tneilC erehpsv erawMV nI 3 .ecnailppa ruoy ngissa ot snoitcnuf fo tes ro noitcnuf hcihw ediced uoy 11 llatsni uoy erofeB yawetaG gnigasseM cetnamyS gnillatsnI 11 ,tcudorp eht llatsni uoy erofeb taht sdnemmocer cetnamyS .)htob ro ,dnuobtuo ,dnuobni(sepyt gniretlif dna tnemnorivne ruoy no gnidneped ylthgils reffid yam stnemngissa eseht ...ylno gniretlif liam dnuobtuo rof rennacS eht gnirugifnoC ylno gniretlif liam dnuobni rof rennacS eht gnirugifnoC gniretlif liam dnuobtuo dna dnuobni rof rennacS eht gnirugifnoC retneC lortnoC eht hguorht rennacS a gniddA retneC lortnoC eht hguorht rennacS a dda ot woH retneC lortnoC eht gnirugifnoC putes laitini gnirud erawtfos tsetal eht ot gnitadpU esnecil ruoy gniretsigeR ecnailppa eht rof elor eht gniyficepS Eht gnificeps sesserdda pi snd dna awetag gnificeps gnituor rof srsda pi citats Guide for details on the configuration of the scanners. 389 Control Center/ Scanners Server LDAP access to the LDAP server for users, groups and research distribution lists if the directory data service is enabled. Configure your firewall if applicable. The same license file can be used to licensed more appliances. Table 1-8 Requirements of the system requirements of web browser article of the system requirements The control center supports the following browsers: Microsoft Internet Explorer 9/8 Mozilla Firefox 13 or subsequent Chrome 19 or subsequent LDAP Symantec Messaging Gateway supports the following types of directory LDAP: Windows 2008 Active Directory (LDAP e Catalogo globale) Windows 2003 Active Directory (sia LDAP che Global Catalog) Sun Directory Server 7.0 Directory Sun Directory 6.3 Sun Directory Server 6.0 Lotus Domino LDAP Server 8.5 Lotus Domino LDAP Server 8.0 Lotus Domino LDAP Server OpenLDAP 2.4 OPndap 2.3 Symantec Messaging Gateway Gateway complies LDAP V.3 and can be configured to work with other types of directory server. It is possible to use the internet root DNS servers or specify internal DNS servers. After updating, the configuration guided procedure seems to help you configure appliance. When contacting technical assistance, please have the following information available: product release level 5 hardware information available memory, disk space and operational version of the NIC information and network gallows at the level of patch, gateway e Address IP Description of error messages: error messages and error messages and error messages and error messages and error messages and messages of error register file resolution of the problems that was performed before contacting the changes to the configuration of the Recent Symantec software and changes to the customer service network if the Symantec product ottodorp ottodorp led enoizazzilaires alla o eznecil ella evitaler ednamod :imelborp id ipit itneuges i emoc ,ehcincet non ednamod a eretsissa rep elibinopsid ¨Ã itneilc oizivres li :LRU'l odneugeS lus ilibinopsid onos itneilc oizivres lus inoizamrofni eL :LRU etneuges la ocincet otroppus id beW anigap artson alla eredecca ,aznecil id evaihc anu o enoizartsiger al Registration updates, such as addresses or names modifications general information on the product (functionality, language availability, local dealers) information on product updates and updates information on the insurance of the update and the support contracts information on the purchase programs of Symantec Consultancy on Symantec technical support options not technical questions. The pre-installation checklist specifies the items and information that must be readily available during the installation and installation of the accessory. Ensure that the environment meets the minimum system requirements. Press the space bar to scroll through the list or type Q to exit the list. For example, the name should look like the following: host6.symantecexample.com 5 When prompted, type the correct time zone. 2 When prompted, enter the IP address of the DNS server. Scanner hostname or IP address: 16 16 Installing Symantec Messaging Gateway Before Installing Table 1-2 Initial Configuration Checklist (Continued) Details Description Completed Item Virtual IP Address (Scanner Configuration Only) If the scanner performs multiple roles (e.g. in outgoing mail filter and in association), Ã you need to have more than one Ethernet interface. See Before installing on page 10. Install and run a virtual appliance using the desired hardware. If the scanner is not in the messaging gateway, Symantec messaging gateway scanners may identify the IP address of the MTA gateway as the source of spam. See Where to place scanners on page 11. Troubleshooting License File Registration 1 On the License Information Registration page, click Utilities. Symantec and the Symantec logo are trademarks or registered trademarks of Symantec Corporation or its affiliates in the United States and other countries. No part of this document may be reproduced in any way without the prior written permission of Symantec Corporation and its licensors, if any. The main role of technical assistance is to respond to specific requests on the characteristics and functionalities of For more information about DRAC, see Dell Support. Close and reopen the browser to ensure that the cached versions of the graphics are displayed correctly. This configuration may cause network bottlenecks, but Ã is suitable for sites with relatively low traffic. By default, the Ã ¨ enabled option New installations by Symantec Messaging Gateway and disabled for the update. 20 20 Installation of Symantec Messaging Gateway before installation notes: the effectiveness and precision of the Symantec Messaging Gateway filter depends on the constant updates of Symantec Global Intelligence Network. Host Server Proxy name: Proxy server holder: address of the administrator (only control center configuration) Symantec Messaging Gateway sends notices to this address, if the notifications of notice are enabled. 11 When all license files are recorded correctly, click Next. As a recommended procedure, place the Symantec messaging gateway scans in front of other filtering and MTA products for the following reasons: filtering products and MTA can modify or remove heading of pre -existing messages or edit the bodies of the messages. It is possible to download this software from the VMware website or directly from the accessory if the ESX VMware server is configured for HTTPS access. Configure control center before configuring the scanners. If you are performing the initial configuration of the accessory, these steps are displayed in the wizard after restarting the accessory. Note: Symantec Messaging Gateway is not intended for use for loading the load. See installation of the Symantec Messaging Gateway product on page 27.33 Installation of the product Symantec Messaging Gateway installation of the Symantec Messaging Gateway 33 product to specify a static IP address for routing 1 when you are requested if you want to add a static IP address for routing, type one Of the following answers: Sãœ No you want to add a static IP address for routing. The technical support group also creates content for our online know -how. For example, the name must be similar to the following: Host6.Symantecexample.com See of the accessory software set on page 30. If the internet root servers are used, make sure you have a rule that allows external access. After carrying out the initial starts of the Del setup, the next step is to configure the Ethernet interfaces. 4 Chapter 1 Installing Symantec Messaging Gateway... You can specify up to three servers. After the setup wizard guides you through the process to setup the Control Center, it automatically begins the process to add a Scanner. 3 Plug in an Ethernet Cable to DRAC port and enable DRAC. Repeat steps 2 through 3 to add another static IP address. NTP servers: Scanner role The Scanner roles are as follows: Scanner role: Inbound and outbound mail filtering Inbound mail filtering only Outbound mail filtering only Scanner host name or IP address (Scanner configuration only) You must provide a host name or IP address for the Scanner. 2 In VMware vsphere Client, right-click on Symantec Messaging Gateway virtual machine and select Power on from right-click menu. Any use, modification, reproduction release, performance, display or disclosure of the Licensed Software and Documentation by the U.S. Government shall be solely in accordance with the terms of this Agreement. See How to add a Scanner through the Control Center on page After you set up your Scanner, configure it based on its intended function, as follows: See Configuring the Scanner for inbound and outbound mail filtering on page 43. See Configuring the Scanner for outbound mail filtering only on page 49. 18 18 Installing Symantec Messaging Gateway Before you install Table 1-4 Outbound mail filtering checklist Completed Item Description Details Outbound mail address This address is the address and port to use for outbound mail filtering. Table 2-1 Step 1 Symantec Messaging Gateway installation process Task and description Unpack the appliance, mount it, and connect the appropriate cables to the appliance box. The License Agreement accompanying the Software does not alter any rights or obligations you may have under those open source or free software licenses. See Configuring the Scanner for inbound mail filtering only on page 46. For example: when requested, type the sober mask for the Ethernet interface 2. The documentation is provided "so as" and all the conditions, declarations and expressed or implicit guarantees, including any implicit guarantee of marketability, appropriate For a particular purpose or non -nonfrangment, they are declared, except for these disclaimers, they are considered legally not valid. For installations only scanners, it is necessary to provide the IP address of the control center that manages the scanner. See on Symantec Messaging Gateway Virtual Edition on page 53. When this option is disabled, Symantec Messaging Gateway does not use all scan technologies to evaluate the attachments for spam. Refer to the guide to the administration of the Symantec messaging gateway for more information on how to configure Symantec Messaging Gateway for use with LDAP. Access to the NTP UDP time service 123 Access to the Control Center (Protected) HTTPS 443 Output access to the Outdoor Internet (protected) HTTPS 443 MTA to the scanner (bidirectional) control center to the scanner (bidirectional) traffic on (agent door), flows As follows: BCC to the Scanner (session request) BCC scanner (Accept Session) BCC to the Scanner (Agent request) Scanner on BCC (Agent Response) BCC to the Scanner (termination session) 24 24 Installation of the system requirements of SYSTEM SYSTEM SYSTEM SYSTEM SYSTEM SYSTEM SYMANTEC RESULT TABLE 1-8 lists the minimum system requirements. Specify the role for After specifying the IP addresses for the default gateway and DNS servers, specify the role for the appliance. Disallowing end-user access to CA spam quarantines significantly increases performance. 1 Symantec Symantec it orteidni allunnA .CARD enoisrev aut al rep lleD otroppus li eratlusnoc ,inoizamrofni iroiretlu reP .odnamoc id agir alled aiccafretni'lla ossecca'l ecsinroF atrop atrop atseuQ 22 HSS ecnailppa'lla otomer ossecA atinifederp atrop allus etoN irassecen illocotorP etseihcir etrop elled illocotorP 7-1 allebaT 32 erallatsni id amirP cetnamyS acitsiggassem id yawetag led enoizallatsnI 32.yawetaG gnigasseM cetnamyS erallatsni id amirp enoizisopsid a ereva onoved ehc etrop el acnele etseihcir etroP etseihcir etroP .eloccip ¹Ãip inoizallatsni rep attada ¨Ã enoizarugifnoc atseuQ .noitaroproC cetnamyS 2102 thgirypoC elagel osivvA 0.01 :enoisreV enoizatnemucoD .eraunitnoc rep otamrifotua otacifitrec li erattecca ,azzerucis id osivva id oiggassem li otazzilausiv eneiv odnauQ 2 .erazzilitu iredised ehc drowssap avoun al ereva id itarucissA .)iggassem ¹Ãip o onu ni isivid(oiggassem li acrofib rennacs ol ,iretirc id ippurg isrevid ni irbmem noc iratanitsed ¹Ãip ah oiggassem nu eS .tneilC erehPSV erawMV etimart cetnamyS acitsiggassem id yawetaG elautriv anihccam alla ideccA :noitidE lautriV yawetaG gnigasseM cetnamyS alled enoizallatsni'l reP .2 :atroP .aticsu ni acitsiggassem id inoizatserp ellus eriulfni ²Ãup ehc ociraccarvos egnuigga PTMS enoizacitnetua'L .2 tenrehtE atrop al rep ozziridni'l etnemlibaborp otlom ¨Ã ozziridni otseuQ .XM atilibA acrecir al erazzilitu elibissop ¨Ã o ocificeps revres nu eracificeps elibissop Ã aticsu ni elacol atsop id angesnoc :PI inimod o izziridnI .ehcifidom el eratroppa rep ossecorp led oizini'lla inrot .01 anigap a ecnailppa'lled inoiznuf ellus idev ollortnoc id ortnec e rennacs olos rennacs ollortnoc id ortneC olos :itneuges i onos ereilgecs ioup ehc ilour I .ollortnoc id ortnec la ottepsir osrevid oihccerappa nu us avort is rennacs oL .odrocca'lled inimret i noc Ãtimrofnoc ni olos otazzilitu eresse ²Ãup e aznecil id odrocca nu id isnes ia otinrof ¨Ã orbil otseuq ni ottircsed erawtfos lI 2 liamthgirB ad atatnemila 0.01 yawetaG enoizallatsni id adiuG to the license registration page. 25 Control Center/ Scanner Server Internal Mail Internal traffic Incoming The Control Center Use Internal Post Hosts to send notices and reports. You are reading a free free preview 17 to 19 are not shown in this preview. After you register your license or after you complete the software update, the Administrator Settings page appears in the setup wizard. Table 1-1 Task Preinstallation tasks Description Plan your deployment. To set up the appliance hardware 1 Unpack the appliance and either rack mount it or place it on a level surface. Type the IP address. About the environmental factors that affect performance Installation checklist Environmental factors affect performance, including historical usage patterns of your particular deployment. to see a list of time zones. You do not want to add a static IP address for routing. Symantec Messaging Gateway communicates with Symantec Security Response over a secure connection for product registration and ongoing operations. You must implement multiple Scanners to perform load balancing. During the initial setup, the installation wizard prompts you to choose the function that each appliance performs. Some ports may need to be opened on your firewall to allow Dell Remote Access Controller (DRAC) access. 8 To specify a proxy server, check Use HTTP Proxy and type the server host name and port. Text-based attachment scanning Symantec Messaging Gateway can scan attachments for spam in an message. Appliance roles When you configure the appliance to be a Control Center and a Scanner, the appliance requires the resources to fulfill both roles. OR MX Lookup host name: Non-local mail delivery You can use MX Lookup, add a new host, or use an existing host. 6 Select your license file and click Open to return to the License Registration page. To specify Ethernet interfaces 1 When you are prompted, type the IP address for the Ethernet interface that is labeled 1 on the back of the appliance. See Configuring the Control Center on page 38. Symantec Messaging Gateway needs unaltered message headers and message bodies to properly filter . Table 1-2 provides a list of the items and information to have on hand when you the hardware and initial software setup of Symantec Messaging Gateway. 81 9 Chapter 1 Installing Symantec Messaging Gateway This chapter includes the following topics: About installation configurations Before you install System requirements Features that can affect performance About installation configurations You can install and run Symantec Messaging Gateway in several ways: Symantec Messaging Gateway appliance Symantec Messaging Gateway Virtual Edition Install and run a physical, Symantec-supplied appliance. See Specifying gateway and DNS IP addresses on page Specify the role for the appliance. 10 10 Installing Symantec Messaging Gateway Before you install Before you install Table 1-1 lists the preinstallation tasks to perform before you install Symantec Messaging Gateway. See Registering your license on page Update the product with the latest software. If there is a firewall between any of your appliances and the Internet, configure the firewall to permit network traffic through certain ports. Product setup is complete and the appliance restarts. You can specify up to three mail servers to accept inbound mail relay. Each time you add a Scanner, you must confirm your licenses or register again. Table 1-3 Inbound mail filtering checklist Completed Item Description Details Inbound mail address This address is the address and port to use for inbound mail filtering. To set the role for the appliance 1 When you are prompted, choose one of the following roles for this appliance: Scanner only Control Center only35 Installing the Symantec Messaging Gateway product Installing the Symantec Messaging Gateway product 35 Scanner and Control Center 2 For Scanner only, when prompted, type the IP address of the Control Center that you intend to use to manage this Scanner. This step is optional. Both Control Center and Scanners use this port if directory data service is enabled. 2 Plug in AC power. 3 Symantec Corporation 350 Ellis Street Mountain View, CA 4 Technical Support Technical Support Symantec Technical Support maintains support centers globally. See Installing the Symantec Messaging Gateway product on page 27. 27.
